

# NGUYỄN THỖ QUANG VINH

Intern Web Developer

**Address:** Ba Na Commune, Da Nang City

**Phone:** 0702608139

**Email:** ntqvinh.251103@gmail.com

**Github:** <https://github.com/QuangVinhNT>

## OVERVIEW

- Final-year Information Technology student passionate about Front-end Development.
- Hands-on experience with React.js, JavaScript (ES6+), HTML, and CSS (TailwindCSS).
- Basic experience using Zustand in small to medium-scale projects.
- Experience consuming RESTful APIs.
- Basic understanding of TypeScript and React Native.
- Basic knowledge of SQL, NoSQL databases.
- Experience with version control using Git (GitHub).
- Quick learner, problem-solver, and team player with strong collaboration skills.
- Current working location: Da Nang, Viet Nam.

## OBJECTIVE

In the short term, I aim to become a proficient front-end developer by deepening my expertise in modern frameworks such as React and Vue, improving my proficiency in TypeScript, and refining my ability to build responsive, high-performance user interfaces. I strive to write clean, maintainable code while continuously enhancing user experience through optimized designs and seamless interactions.

In the long term, my goal is to become a proficient full-stack developer, capable of designing and implementing scalable, highperforming web applications. I plan to expand my knowledge of back-end technologies, including databases, API development, and cloud services, to build end-to-end solutions. By staying updated with industry trends and best practices, I aim to contribute effectively to complex projects, collaborate across teams, and take on leadership roles in software development.

## EDUCATION

University of Education and Technology - University of Da Nang  
Information Technology - GPA: 3.51/4

Sep 2021 - Present

## ADDITIONAL INFORMATION

- **Main Technical Skills:** JavaScript (ReactJS, NodeJS, ExpressJS), TailwindCSS.
- **Languages:** English reading comprehension.
- **Side Technical Skills:** Git, TypeScript, SQL Server, MySQL, MongoDB, React Native.

## WORK EXPERIENCE

Intern Web Developer, Danang Agency Technology Company Limited

Aug 2025 - Oct 2025

- Developing a student emotion tracking web application using React.js (Zustand, Tailwind CSS, React Router DOM, Axios) and Node.js (Express.js, Sequelize).
- Built a responsive and intuitive interface for teachers and students, ensuring smooth data visualization and interaction.
- Designed and implemented RESTful APIs and data models to manage and analyze emotion data effectively.
- Developed and customized WordPress plugins and admin pages using HTML, CSS, JavaScript, and PHP, including secure AJAX data handling.
- Used Git for version control and participated in collaborative code reviews.

## Intern Front-end Developer, Viet Tri Dao Digital Technology Co., Ltd

Jun 2024 - Jul 2024

- Collaborated with design and backend teams to develop responsive user interfaces using HTML, CSS (TailwindCSS), and JavaScript (React.js).
- Converted Figma design mockups into interactive, pixel-perfect web pages.
- Implemented dynamic features such as form validation, interactive components, and modals.
- Ensured cross-browser compatibility and responsiveness on mobile and desktop.
- Participated in daily standups and sprint planning as part of the Agile development process.
- Used Git for version control and participated in code reviews.

## PROJECTS

---

### Dnfresh (Fullstack Developer - Learning Project)

Mar 2025 - Jun 2025

- **Github:** <https://github.com/QuangVinhNT/dn-fresh>
- **Number of member:** 1
- **Technology:** TypeScript, ReactJS, SCSS, Zustand, Git, NodeJS, ExpressJS.
- **Description:**
  - Designed and developed a full-stack web application for food inventory management combined with an e-commerce platform.
  - Built a scalable backend with Node.js, TypeScript, Express, and MySQL using a clean architecture pattern (DAO → Service → Controller).
  - Implemented authentication with JWT, role-based access control for admins and customers.
  - Developed RESTful APIs for warehouse management (stock, products, categories), media management (Cloudinary), and customer features (cart, orders).
  - Created a responsive frontend using React with features like real-time stock display, cart management, order tracking, and admin dashboards with data visualization (Recharts).
  - Ensured data consistency between inventory and customer orders with accurate stock tracking.

### Luxana Book Store (Front-end Developer - Learning Project)

Nov 2024 - Dec 2024

- **Github:** [https://github.com/QuangVinhNT/book\\_shop\\_project](https://github.com/QuangVinhNT/book_shop_project)
- **Number of member:** 4
- **Technology:** ReactJS, TailwindCSS, Zustand, Git.
- **Description:**
  - Developed and maintained the React.js frontend for a seamless shopping experience.
  - Designed and implemented a responsive UI using TailwindCSS.
  - Managed global state efficiently using Zustand.
  - Integrated RESTful APIs for book listings, user authentication, and order management.
  - Implemented search filters, category-based browsing, and user reviews to enhance user engagement.
  - Used Git & GitHub for version control and team collaboration.

### Auction Web for USA (Front-end Developer - Intern Project)

Jun 2024 - Jul 2024

- **Github:** <https://github.com/team1mockproject/mock-project>
- **Number of member:** 20
- **Technology:** ReactJS, TailwindCSS, Git.
- **Description:**
  - Developed and maintained the Front-end using ReactJS for auction updates.
  - Intergrated RESTful APIs to fetch auction items, process bids and manage user authentication.
  - Designed a responsive and user-friendly UI using TailwindCSS for better engagement.
  - Developed bidding features to ensure smooth and competitive auctions.
  - Use Git & Github for version control and collaborative development.
  - Participated in team meetings, code reviews and debugging sessions to improve project quality.
