

Nguyễn Thọ Quang Vinh

Intern Web Developer **Dob:** Nov 25, 2003 **Gender:** Male

Phone: 0702 608 139

Email: ntqvinh.251103@gmail.com **Address:** Ba Na Commune, Da Nang City

OVERVIEW

- Final-year Information Technology student passionate about Front-end Development.
- Proficient in React.js, JavaScript (ES6+), HTML, and CSS (SCSS, TailwindCSS).
- Understanding of React hooks, component lifecycle, and state management (Redux, Zustand).
- Experience working with RESTful APIs, SQL, NoSQL.
- Knowledge of TypeScript and React Native.
- Familiarity with UI libraries such as Material-UI, Ant Design.
- Experience with version control using Git (GitHub, Bitbucket).
- Comfortable working with Docker.
- English reading comprehension.
- Quick learner, problem-solver, and team player with strong collaboration skills.
- Current working location: Da Nang, Viet Nam.

OBJECTIVE

In the short term, I aim to become a proficient front-end developer by deepening my expertise in modern frameworks such as React and Vue, improving my proficiency in TypeScript, and refining my ability to build responsive, high-performance user interfaces. I strive to write clean, maintainable code while continuously enhancing user experience through optimized designs and seamless interactions.

In the long term, my goal is to become a proficient full-stack developer, capable of designing and implementing scalable, high-performing web applications. I plan to expand my knowledge of back-end technologies, including databases, API development, and cloud services, to build endto-end solutions. By staying updated with industry trends and best practices, I aim to contribute effectively to complex projects, collaborate across teams, and take on leadership roles in software development.

EDUCATION

Sep 2021 - Present	University of Education and Technology - University of Da Nang	
	Information Technology	
	GPA: 3.55/4	

SKILLS

Main	HTML, CSS (TailwindCSS, SCSS), JavaScript (ReactJS, React Native)	
Language	English reading comprehension	
Other	Git, TypeScript, SQL Server, MySQL, MongoDB, RESTful API, Python (Flask), NodeJS (ExpressJS)	

WORK EXPERIENCE

Jun 2024 - July 2024 Viet Tri Dao Digital Technology Co., Ltd

Position: Intern Front-end Developer

• Collaborated with design and backend teams to develop responsive user interfaces using HTML, CSS (TailwindCSS), and JavaScript (React.js).

- Converted Figma design mockups into interactive, pixel-perfect web pages.
- Implemented dynamic features such as form validation, interactive components, and modals.
- Ensured cross-browser compatibility and responsiveness on mobile and desktop.
- Participated in daily standups and sprint planning as part of the Agile development process.
- Used Git for version control and participated in code reviews.

PROJECTS

Dnfresh

(Mar 2025 - Jun 2025)

Project Type	Learning Project (https://github.com/QuangVinhNT/dn-fresh)
Description	A full-stack web application for managing food inventory and selling products online. The system includes an admin dashboard for warehouse management (stock, categories, expiration dates, and reports) and a customer-facing website for browsing products, managing carts, and placing orders. Built with Node.js, TypeScript, MySQL, and React. The backend follows a clean architecture (DAO → Service → Controller) with secure authentication, role-based access control, and Cloudinary for media storage.
Number of member	1
Position	Fullstack Developer
Main responsibilities	 Designed and developed a full-stack web application for food inventory management combined with an e-commerce platform. Built a scalable backend with Node.js, TypeScript, Express, and MySQL using a clean architecture pattern (DAO → Service → Controller). Implemented authentication with JWT, role-based access control for admins and customers. Developed RESTful APIs for warehouse management (stock, products, categories), media management (Cloudinary), and customer features (cart, orders). Created a responsive frontend using React with features like real-time stock display, cart management, order tracking, and admin dashboards with data visualization (Recharts). Ensured data consistency between inventory and customer orders with accurate stock tracking.
Technology	TypeScript, ReactJS, SCSS, Zustand, Git, NodeJS, ExpressJS

Luxana Book Store

(Nov 2024 - Dec 2024)

Project Type	Learning Project (https://github.com/QuangVinhNT/book_shop_project)
Description	Luxana Book Store is an online E-Commerce platform for book lovers, offering a wide range of books across various genres. The platform provides a seamless shopping experience with features such as book browsing, advanced search, personalized recommendations, and secure checkout.
Number of member	4
Position	Front-end Developer
Main responsibilities	 Developed and maintained the React.js frontend for a seamless shopping experience. Designed and implemented a responsive UI using TailwindCSS. Managed global state efficiently using Zustand. Integrated RESTful APIs for book listings, user authentication, and order management. Implemented search filters, category-based browsing, and user reviews to enhance user engagement.

	Used Git & GitHub for version control and team collaboration.
Technology	ReactJS, TailwindCSS, Zustand, Git

Auction Web for USA (Intern in Viet Tri Dao Digital Technology Co., Ltd)

(Jun 2024 - July 2024)

Project Type	Intern Project (https://github.com/team1mockproject/mock-project)
Description	A web-based auction platform designed for the USA market, allowing users to bid on products in real time with a secure and seamless experience. The system ensures transparency, fast bidding updates, and an intuitive user interface.
Number of member	20
Position	Front-end Developer
Main responsibilities	 Developed and maintained the frontend using React.js for real-time auction updates. Integrated RESTful APIs to fetch auction items, process bids, and manage user authentication. Designed a responsive and user-friendly UI using TailwindCSS for better engagement. Developed real-time bidding features to ensure smooth and competitive auctions. Used Git & GitHub for version control and collaborative development. Participated in team meetings, code reviews, and debugging sessions to improve project quality.
Technology	ReactJS, TailwindCSS, Git
