

NGUYỄN THỖ QUANG VINH

Fresher Developer

Address: Ba Na Commune, Da Nang City
Phone: 0702608139
Email: ntqvinh.251103@gmail.com
Github: <https://github.com/QuangVinhNT>
Portfolio: <https://portfolio-moppie.vercel.app/>

OVERVIEW

- Hands-on experience with React.js, JavaScript (ES6+), TypeScript, HTML, and CSS (TailwindCSS).
- Basic experience using Zustand, Redux, Tanstack Query in small to medium-scale projects.
- Experience consuming RESTful APIs.
- Basic knowledge of SQL, NoSQL databases.
- Experience with version control using Git (GitHub).
- Quick learner, problem-solver, and team player with strong collaboration skills.
- Foreign language: English.
- Current working location: Da Nang, Viet Nam.

EDUCATION

University of Technology and Education - University of Da Nang
Information Technology - GPA: 3.52/4

Sep 2021 - May 2026

WORK EXPERIENCE

- Intern Web Developer (NodeJS), RIKAI Technology Da Nang

Mar 2026 - Present

 - Developed a Bus Management web application tailored for Japanese clients, utilizing Next.js, NestJS, and PostgreSQL.
 - Collaborated closely with the QA team to identify, debug, and resolve technical issues, ensuring application stability.
 - Utilized Git for version control and participated in code reviews to maintain code standards.
- Intern Web Developer, Danang Agency Technology Company Limited

Aug 2025 - Oct 2025

 - Developed a web application about check-in-out and tracking emotion using React.js, Node.js, PHP to support data visualization and user interaction.
 - Implemented RESTful APIs and data models for managing application data.
 - Built responsive user interfaces and ensured consistent behavior across devices.
 - Used Git for version control and collaborated through code review.
- Intern Front-end Developer, Viet Tri Dao Digital Technology Co., Ltd

Jun 2024 - Sep 2024

 - Collaborated with design and backend teams to develop responsive user interfaces about auction using HTML, CSS (TailwindCSS), and JavaScript (React.js).
 - Converted Figma design mockups into interactive, pixel-perfect web pages.
 - Implemented dynamic features such as form validation, interactive components, and modals.
 - Ensured cross-browser compatibility and responsiveness on mobile and desktop.
 - Participated in daily standups and sprint planning as part of the Agile development process.
 - Used Git for version control and participated in code reviews.

PROJECTS

QuickShow (Fullstack Developer - Learning Project)

Feb 2026 - Mar 2026

- **Github:** <https://github.com/QuangVinhNT/dn-fresh>
- **Deploy Demo:** <https://moppie-quickshow.vercel.app/>
- **Number of member:** 1
- **Technology:** ReactJS, TailwindCSS, Axios, Git, NodeJS, ExpressJS, MongoDB, Clerk, Inngest.
- **Description:**
 - Developed and deploy a Full Stack Movie Ticket Booking Website using MERN Stack.
 - User can signup, explore the movies and book the tickets. While booking tickets, user can choose their preferred seats.
 - Admin can add new movies and manage the bookings.
 - For creating user authentication, I use Clerk, that allows me to integrate multiple signup options like Email signup, Social signup,...
 - I added Inngest in this project to manage the Background Jobs and scheduling. Using Inngest functions I will send email to all users, whenever a new movie is added. I will also send the booking confirmation email and reminder email just few hours before their movie time.
 - When user book a ticket, and the payment get cancelled or failed, in that case their seats will be reserved for the next 10 minutes, so that user can re-try the online payment, and if the user doesn't make the payment within 10 minutes, then their seats will be released.

Dnfresh (Fullstack Developer - Learning Project)

Mar 2025 - Jun 2025

- **Github:** <https://github.com/QuangVinhNT/dn-fresh>
- **Number of member:** 1
- **Technology:** TypeScript, ReactJS, SCSS, Zustand, Git, NodeJS, ExpressJS.
- **Description:**
 - Designed and developed a full-stack web application for food inventory management combined with an e-commerce platform.
 - Built a scalable backend with Node.js, TypeScript, Express, and MySQL using a clean architecture pattern (DAO → Service → Controller).
 - Implemented authentication with JWT, role-based access control for admins and customers.
 - Developed RESTful APIs for warehouse management (stock, products, categories), media management (Cloudinary), and customer features (cart, orders).
 - Created a responsive frontend using React with features like real-time stock display, cart management, order tracking, and admin dashboards with data visualization (Recharts).
 - Ensured data consistency between inventory and customer orders with accurate stock tracking.

Luxana Book Store (Front-end Developer - Learning Project)

Nov 2024 - Dec 2024

- **Github:** https://github.com/QuangVinhNT/book_shop_project
- **Number of member:** 4
- **Technology:** ReactJS, TailwindCSS, Zustand, Git.
- **Description:**
 - Developed and maintained the React.js frontend for a seamless shopping experience.
 - Designed and implemented a responsive UI using TailwindCSS.
 - Managed global state efficiently using Zustand.
 - Integrated RESTful APIs for book listings, user authentication, and order management.
 - Implemented search filters, category-based browsing, and user reviews to enhance user engagement.
 - Used Git & GitHub for version control and team collaboration.
